The main goals for this slide [1]:

This is just to show you how this *template* works

There are two 'emphasize' functions used to highlight & italicize texts

'\empy' does *this* and '\empr' does *this*.

The colors in this template is selected from the official Stanford Identity website:

<https://identity.stanford.edu/color.html>

Note that hyperlinks, by default, are not highlighted. Of course, you can change this: e.g.,

<https://github.com/sanhacheong/stanford-beamer-presentation>

[1] Allison, *Proceedings ION GPS-91. Albuquerque, New Mexico, 11-13 September, 1991.*

A (hopefully) useful function in this L^AT_EX template is:

```
\examplebox{ExampleTitle}{ExampleContents}
```

which does this:

Example of the Command `\examplebox`

This is what it does. Pretty self-explanatory, isn't it?

Given the color them, I *recommend* using `\empr` inside of `examplebox`. The `\empy` command does not look *that* good.
