Goals

The main goals for this slide [1]:

- ▶ This is just to show you how this *template* works

- ▶ There are two 'emphasize' functions used to highlight & italicize texts

    - ▶ '\empy' does *this* and '\empr' does *this*.

- ▶ The colors in this template is selected from the official Stanford Identity website: https://identity.stanford.edu/color.html

- ▶ Note that hyperlinks, by default, are not highlighted. Of course, you can change this: e.g., *https://github.com/sanhacheong/stanford_beamer_presentation*

Example

A (hopefully) useful function in this LaTeX template is:

$$\text{\textbackslash examplebox\{ExampleTitle\}\{ExampleContents\}}$$

which does this:

> ### Example of the Command \examplebox
>
> This is what it does. Pretty self-explanatory, isn't it?
> Given the color them, I *recommend* using \empr inside of examplebox. The \empy command does not look *that* good.
